About Me

Computer Engineering graduate and frontend developer passionate about building user-focused digital solutions. While I have a strong foundation in React and modern web technologies, I'm currently expanding my skill set into Microsoft Power Platform (Power Apps, Power Automate, SharePoint) to create smart and efficient business applications. I'm eager to learn, collaborate, and contribute to process automation projects in Agile teams.

Education

B.Sc. in Computer Engineering
Süleyman Demirel University 2021-2025
GPA: 2.95 / 4.0

Skills

- Tech Stack: React, TypeScript, Next.js, REST API, Node.js, Express.js, MongoDB, Power Apps, Power Automate (basic)
- UI/Styling: Tailwind CSS, Material UI, Bootstrap, CSS Grid/Flexbox
- Tools: Git & GitHub, Jira, Figma, SharePoint, Dataverse
- Other: Redux, Zustand, Agile/Scrum, JWT Authentication, Performance Optimization

Languages

English (B1 - Intermediate)

Experience

Full Stack Developer Intern

Aug 2025 - Sep 2025

Codveda Technologies

- Developed User Management System with React, TypeScript and Node.js backend.
- Implemented JWT-based authentication system with role-based access control.
- Built RESTful APIs with Express.js and MongoDB for CRUD operations.
- Participated in code reviews and applied performance optimization techniques.

Frontend Developer

Nov 2024 - Jun 2025

mfatech

- Contributed to the development of a corporate workspace application.
- Built reusable React components with TypeScript.
- Integrated REST APIs, improved user interfaces.
- Actively participated in Agile development using Scrum methodology.
- Participated in code review processes.

Software Engineer Intern

Jun 2024 - Aug 2024

VBT Yazılım A.Ş

- Participated in frontend development and mobile application design projects.
- Developed user experience-focused solutions in UI/UX design processes.
- Enhanced my teamwork and problem-solving skills.
- Created cross-device compatible solutions using responsive design principles.

Software & Hardware Engineer Intern

Jul 2023 - Aug 2023

Simav Belediyesi - IT Department

- Provided technical support in computer hardware setup and maintenance processes.
- Gained experience in network configurations and system security applications.
- Contributed to customer service quality by supporting the municipality's daily IT operations.

Projects

User Management System

Developed a full-stack user and content management platform with authentication system, database integration, and modern UI design. Built with React frontend and Node.js backend for scalable architecture.

Key Technologies: React, TypeScript, Node.js, Express.js, MongoDB, JWT Authentication, REST API, Advanced CSS, Responsive Design

Feasta - Full Stack Food Ordering App

Developed a responsive food ordering platform with user authentication, restaurant listings, and order management. Implemented using NextAuth and Redux Toolkit for seamless user experience and state management.

Key Technologies: React, Next.js, NextAuth, Redux Toolkit, TypeScript, REST API, Responsive Design

Automation Flow Demo (Personal Learning Project)

Experimented with Microsoft Power Automate and Power Apps to create a simple workflow automating task submissions from a SharePoint list.

Key Technologies: Power Apps, Power Automate, SharePoint, Dataverse (basic)

Personal Portfolio Website

Designed and developed a responsive portfolio website showcasing personal projects and contact information with modern UI/UX principles and performance optimization.

Key Technologies: React, Next.js, TypeScript, Responsive Design, Performance Optimization
